

# TANMAY JHUNJHUNWALA

| Toronto, ON |

AWS-Certified Solutions Architect, DevOps and Cloud Engineer with 5 years of hands-on delivery across enterprise cloud migration, telecom, retail, and commodity trading. Proven record of boosting revenue, accelerating delivery, and trimming cloud OpEx through secure, cost-optimized AWS solutions and automated CI/CD pipelines. Specializes in containerized microservices on EKS, serverless patterns with Lambda & API Gateway, and IaC automation (Terraform/CloudFormation) secured by zero-trust IAM. Actively expanding expertise in Agentic-AI workflows with AWS Bedrock and LangChain.

- – Aurora PostgreSQL, CloudFormation, CloudFront, CloudTrail, CloudWatch, Cognito, Cost Explorer, DynamoDB, EC2, ECS, EKS, Fargate, Lambda + API Gateway, Redis, Route 53, S3, Shield, VPC, WAF
- – AWS CDK, AWS X-Ray, Datadog, Docker/Compose, GitHub Actions, GitLab CI/CD, Grafana, Helm, Incident Response/Troubleshooting, Jenkins, Kubernetes, OpenSearch, OpenTelemetry, Prometheus, Terraform

| Toronto, Canada

Oct 2024 – Present

- Achieved 120% of monthly targets architecting bespoke multi-service connectivity portfolios aligned to client expectations
- Elevated ARPU by 30% leveraging TCO and usage-projection analyses to right-size solutions
- Mentored newly hired consultants in practical solution-architecture principles and cost-benefit assessments

| Toronto, Canada

Oct 2023 – Oct 2024

- Earned Shrink-Prevention Excellence Award for securing high-value inventory, preventing theft, and sustaining 100% stock accuracy through streamlined workflows and cross-team coordination
- Navigated Blueprint leadership team to turn frontline feedback into process improvements, resulting in a 25% reduction in stock put-away and a 15% boost in employee engagement

| Mumbai, India

Jan 2021 – Aug 2023

- Brokered ~US\$ 29MM in annual contracts with 100% client retention, expanding portfolio with 40% new accounts by leveraging real-time price analytics and inventory forecasts to time trades and protect margins
- Developed android-based real-time order tracking dashboard automating order confirmations and shortening settlement cycles by 40%; strengthening process automation, data governance, and cost control

| Bengaluru, India

Oct 2019 – Dec 2020

- Delivered zero-downtime migration of Roads and Maritime Services Australia – systems to AWS (S3, RDS, PostgreSQL, EC2, EKS)
- Authored Terraform/CloudFormation modules cutting spin-up time by 70% (40 to 12 min.)
- Dockerized 20+ microservices with Kubernetes manifests for consistent rollouts on EKS
- Enforced least-privilege IAM and VPC security-group controls with CloudWatch alerts, eliminating crucial audit findings
- Automated CI/CD for EC2 workloads via AWS CodeDeploy and CLI scripts, delivering repeatable and scalable release pipelines

– Flagged idle EC2/EBS/S3 and posted Slack alerts with LangChain + Bedrock Agents

Aug 2025

- Saved 12% (~US\$ 5K/yr.) running containerized Lambda based bot orchestrated with CDK + Step Functions
- Dropped false positives from 18% to 3% by recording suppression history in Pinecone vector index

– Terraform + Helm provisioned Node/TypeScript microservices

Apr 2025

- Enabled zero touch blue-green releases via GitHub Actions, reducing deploy time by 85% (45 to 7 min.)
- Slashed median TTFB by 45% (220 to 120 ms.) and blocked 100% OWASP top 10 probes, with CloudFront caching + WAF
